

MATH WITH PAPER: ORIGAMI DOG

Origami is great for thinking about shapes and spatial relations!

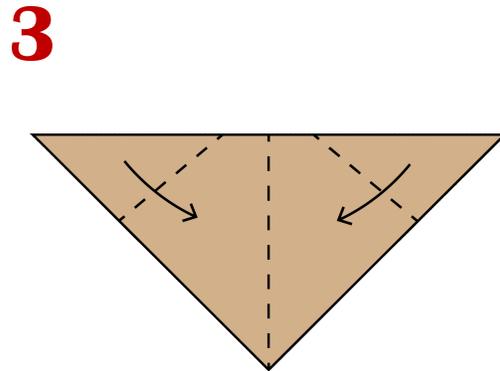

We've included some examples of things you can say to encourage your child's spatial thinking as you work together to make your origami dog!

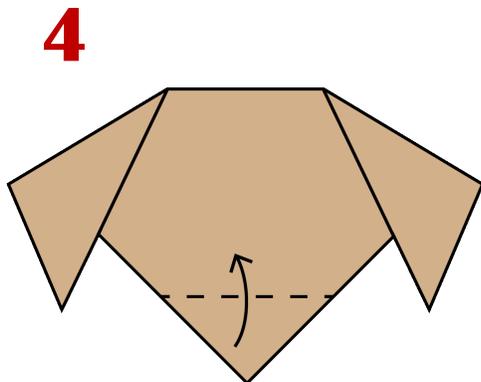

"We have to bring the two **CORNERS** together so the **EDGES** touch."

"Let's fold the **TRIANGLE** in **HALF**, to make a line down the **MIDDLE**."

"We have to fold the **TOP** two **CORNERS** down to make the dog's ears."

"What **SHAPE** are the dog's ears and nose?"
