

Jack-O'-Lantern Math: One Pumpkin, Many Faces!

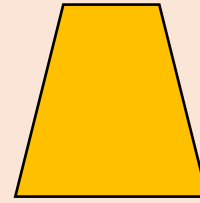

Equilateral Triangle:

All sides are the same length, and all angles are the same size.

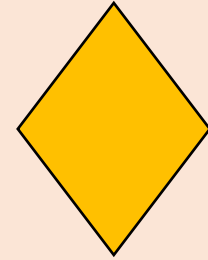

Right Triangle:

A triangle with one 90-degree angle!

Trapezoid: a four-sided shape with only one pair of parallel sides!

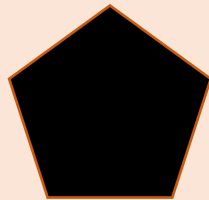

Rhombus: a four-sided shape with sides of equal length, where opposite angles are equal. [If each angle is 90° , the shape is a square.]

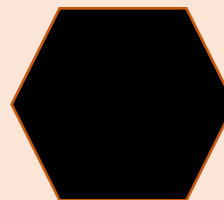

DID YOU KNOW:

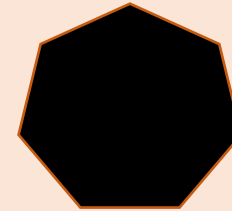

Polygons are flat, closed shapes with straight sides. All the shapes on this page are polygons!

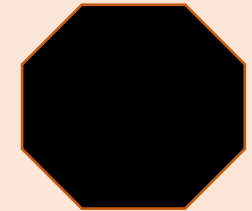

Pentagon: a polygon with five sides and five angles.

Hexagon: a polygon with six sides and six angles.

Heptagon: a polygon with seven sides and seven angles.

Octagon: a polygon with eight sides and eight angles.
